

# Digital product: Smart Battery

We monitor your work zone with our connected digital **"Smart Batteries"** for lowered cost and optimized supervision.

## Overview

The Smart Battery lid was introduced 2021 and has become a necessity by ensuring up-time for equipment used with batteries.

The Smart Battery is connected and informs about each batteries

- Position
- Orientation
- Incident
- Battery voltage

## Supervision on Digital plattform

## Benifits

### Increased safety

...for road Users, ensuring always functional batteries and warning lights.  
...for road workers, optimizing supervision for service of battery

### Better service

...quick response in case of alarm, with automated generated information and notification in case of incident

### Lowered cost

...50-70% lowered cost for supervision and battery service

### Improved sustainability

...with less transportation - lowered CO2 emissions and extended battery life-time
